

## General questions

### 1. My study will consist of the following activity:

#### *No data of individual participants*

1. No data of individual participants, because...
  - a. The study concerns simulated data
  - b. The study concerns a meta-study (systematic review)
  - c. The data are already aggregated over individual participants
  - d. The study concerns a theoretical question, no empirical data

#### *Secondary use of existing data*

2. Data collection was approved earlier by FERB or MERB.
3. Open access data (DANS, ICPSR, GESIS), and Statistics Netherlands
4. Online data such as social media data or data scraped from web pages

#### *New data collection*

FERB approved research line

Online collection of questionnaire data

Offline collection of questionnaire data

Open or semi-open interview

Naturalistic observation

Observational research, video and/or audio

Observational research, researchers observes without recording devices

Intervention study (not in lab)

Lab studies

research of stimuli (sound, smell, electric shock)

EEG, EMG, SCR

Eye-tracking

Behavioural tasks

Participant observation

Other

Does your study consist of additional activities? (IF YES, ALLOW TO FILL IN OTHER NEW DATA COLLECTION. IF NO, GO TO Protocol specific)
